

## **Fine Details and Impeccable Craftsmanship Define Century Product Line In Residential Construction**

(Marietta, Ga.) – Elegant corbels, finely detailed mouldings and eye-catching domes and medallions create the “ooh and ahh” in beautiful home décor. Now, more than ever, homeowners are seeking upscale amenities, style and attention to detail. Today’s homeowner wants their personality and style reflected in their living spaces, especially the baby-boomer generation buying their dream homes.

Century manufactures a full range of decorative architectural products in three distinctive groupings, Decorative Mouldings, Wall Accents and Ceiling Accents. Over five-hundred unique products span such diverse groups as, chair rail mouldings, radius and contour mouldings, corbels, niches, door and window surrounds, ceiling domes and medallions. Many of Century’s decorative mouldings and accent products are designed to compliment each other. For instance, Greek Revival motifs, a style very popular today, can be found on Acanthus [MC 1031] crown moulding, Grecian [CR 3072] chair rail moulding, Corinthian [CB 709], Olympus [CB 702] and Micanos [CB 735] corbels and many other products.

Manufacturing decorative products from high-density polyurethane or fiberglass, allows for more intricate designs, deep relief and finer detailing. Delicate lattice weaves, intertwined acanthus leaves, intricate garlands, French scrolls and exquisite floral motifs are not just standard fare with Century, they are what set them apart in the industry. Century products are virtually maintenance free, impervious to insects, will not rot, split or crack and are backed by a 3-Year Limited Warranty.

Century Architectural Specialties offers one of the widest selections of decorative architectural products to the industry manufacturing over five-hundred product profiles for both interior and exterior applications. Century sells exclusively through building products dealers, designers and retail outlets.
